

Ensuring Safe Data Delivery

Your Exclusive Invitation

Hacking Trends

Identity Theft

Disk Encryption Vulnerabilities

CNS Security Chapter is your chance to hear about what hackers are looking for, how positively asserting identity is key for organisations and how full disk encryption might not be as secure as you'd hoped.

The intention of the update is to give CNS customers and trusted parties an exclusive insight to recent findings, developments, opinions & techniques from CNS's Security Assessment and Vulnerability Research teams. Our experts will talk candidly to you about what they know are key concerns within businesses like yours, and what they see the spend prediction over the next coming years to be.

We invite you to join our Security Chapter and hear how, in a difficult climate, being informed can make the difference!

When: 28th January 2010
Where: The Little Ship Club, Bell Wharf Lane,
Upper Thames Street, London, EC4R 3TB
www.littleshipclub.co.uk
Time: 0800hrs - 1000hrs
Cost: Free to Attend

Security planning and ROI for a 5 year plan
Scenario modelling and spend
- 10:00 Attendees Depart Security Chapter

Presenters will focus on “Real World” compliance, security and business challenges. It is important to us that you have a productive and valuable morning with us. Our staff will be to hand, should you wish to continue discussions with us on a particular topic.

If you would like to reserve your place for this quarterly event, please contact Maria Alvarez on maria.alvarez@cnsuk.co.uk or 02072130999.

About CNS

Convergent Network Solutions Ltd is a highly accredited London based Security Assessor and Network Security Specialist. Our goal is to create a truly pragmatic approach to security for all of our customers. We specialise in understanding the security market, compliance requirements and our customers’ specific internal policies and match them with services and solutions that fit their need. This is all underpinned with a high level of service and support to our customers. CNS was established in 1999 in response to market demand for a highly skilled security and networking consultancy in the heart of the city. CNS has grown rapidly since this time, both in company size, the depth and breadth of services offered and reputation for providing exemplary service. The company is majority owned by the principle directors.
